A little about the KGC coffee blend...

We make our own blend of the finest Indian certified organic shade grown Arabica and Robusta coffee varieties from various plantations in the southern states. Selected for their spicy notes and bold-yet-smooth taste; all our coffees are sourced from plantations which engage in sustainable practices. The coffee plants are grown in the shade of the surrounding forest, thereby maintaining full biodiversity and a rich self-supporting ecosystem of native plants and animals. Not only does this produce a 100% natural coffee, your rupee also goes towards safeguarding the local environment. For our decaf selection, we choose Italian blends that can offer an acceptable body and crema.

The dark sugar we serve is made from organic jaggery and is well recommended with coffee and super healthy. Our lighter sugar is not chemically treated like white sugar, yet has a neutral taste which works well for people unused to the strong flavour of jaggery.

Prices are inclusive of all government taxes and we levy no service charge.
